

**Thyssengas GmbH  
Price Sheet for Shippers and  
Downstream Network Operators as of  
01.01.2014**

***Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.***

Price sheet as of 01.01.2014

This Price Sheet is an essential part of the General Terms and Conditions of Entry and Exit Contract (Entry-Exit-System) of Thyssengas dated 01.08.2013 for Transports as of 01.10.2013 (in the following EAV) as well as an essential part of the internal order according to Sections 11 ff. of the Cooperation Agreement between Operators of Gas Networks in Germany as amended on 28.06.2013 (in the following KoV VI).

## 1. Network tariffs

The network tariffs payable for all net points can be derived from the following table:

Network tariffs valid for the months January until December in €/(kWh/h)/d:

Tariffs in €/(kWh/h)/d*)	H-Gas	L-Gas
Entry point	0.00712329	0.00528767
Exit point	0.01846575	0.01846575
Exit point storage	0.00627397	---
Entry point storage	0.00600000	---

\*) These tariffs contain the costs according to Section 12 para. 1 sentence 2 und para. 2 sentence 3 GasNZV.

The network tariffs are also shown in the Information assistant under [www.thyssengas.com](http://www.thyssengas.com) (Network enquiries service/Transparency information/Information assistant).

The booking period is from the beginning up to the end of the provision of the booked capacity by Thyssengas.

**Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.**

Price sheet as of 01.01.2014

The tariff payable for the corresponding accounting month results from the sum of the daily tariffs for the booked days within the corresponding accounting month.

### **1.1 Network tariffs for firm capacities**

The network tariffs payable by shippers or downstream network operators for firm capacities are calculated as follows: The network tariff for the entry or exit capacities at one entry or exit point is determined as the product of the agreed entry or exit capacity in kWh/h and the sum of the daily network tariffs at the entry or exit point concerned in €/(kWh/h)/d for the respective booking period.

### **1.2 Network tariffs for interruptible capacities**

The network tariff for interruptible entry capacities at cross-border interconnection points and market area interconnection points amounts to 95 % of the network tariff valid at the respective entry point for firm capacities according to article 1.

The network tariff for interruptible entry capacities at storages and for interruptible exit capacities at storages, to end-consumers and to downstream network operators amounts to 60% of the network tariff valid at the respective entry or exit point for firm capacities according to article 1.

## **2. Charges for counter-flow capacities**

For interruptible counter-flow capacities shippers pay 60 % of the respective entry tariff for firm capacities in the main flow direction.

***Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.***

---

Price sheet as of 01.01.2014

### **3. Contract penalty**

The contract penalty according to Section 30 para. 4 EAV in conjunction with Section 10 of the Supplementary Terms and Conditions of Thyssengas of 01.08.2013 for exceeding the booked capacity for each day with exceeded capacity as well as according to Section 18 para. 7 KoV VI for exceeding the ordered capacity for each day with exceeded capacity is determined as the product of the highest hourly exceeding capacity and 4 times the agreed specific network tariff for the respective entry or exit point for the corresponding day with exceeded capacity according to article 1 of this price sheet.

### **4. Prices for settlement of excess / shortfall quantities**

The monthly average settlement energy price applicable for settlement of excess / shortfall quantities for SLP and RLM customers per Section 24 para. 3 and 4 EAV is published on the Internet under [www.net-connect-germany.de](http://www.net-connect-germany.de) (Excess/Shortfall quantity price SLP / Excess/Shortfall quantity price RLM).

### **5. Biogas Levy**

The biogas levy according to Section 25 para. 1 EAV as well as Section 7 KoV VI amounts to 0,51 €/(kWh/h)/a.

The biogas levy is raised at exit points to connected end-consumers and downstream network operators, respectively.

### **6. Tariffs for meter operation, meter reading and billing**

The tariffs for meter operation, meter reading and billing are as follows:

***Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.***

Price sheet as of 01.01.2014

## 6.1 Tariffs for meter operation at exit points to end-consumers and network interconnection points

For the case that Thyssengas is the meter operator, the following tariffs apply:

### 6.1.1 Tariffs for the case that Thyssengas is the owner of the measuring system

Meter size	Meter without electronic supplementary equipment <sup>1)</sup>	Meter with electronic supplementary equipment up to DP 16 - compact gas volume converter <sup>2)</sup>	Meter with electronic supplementary equipment up to DP 16 <sup>3)</sup>	Meter with electronic supplementary equipment greater than DP 16 <sup>4)</sup>
	€/a	€/a	€/a	€/a
≤ G6	55.81	---	---	---
G10	81.68	---	---	---
G16	85.89	---	---	---
G25	104.82	958.41	1,619.80	---
G40	278.84	1,132.43	1,793.82	---
G65	354.95	1,153.22	1,814.61	1,930.34
G100	403.76	1,202.03	1,863.42	2,028.70

**Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.**

### 6.1.2 Tariffs for the case that Thyssengas is not the owner of the measuring system

The metering equipment shall be maintained according to DVGW worksheet G 495 by the party responsible / operator of the gas pressure regulating and measuring system (GDRM).

This is similarly valid for necessary measures (malfunction, line change etc.) relating to the GDRM-system as well as the measuring equipment because of operational or calibration requirements.

Meter size	Meter without electronic supplementary equipment <sup>1)</sup>	Meter with electronic supplementary equipment up to DP 16 - compact gas volume converter <sup>2)</sup>	Meter with electronic supplementary equipment up to DP 16 <sup>3)</sup>	Meter with electronic supplementary equipment greater than DP 16 <sup>4)</sup>

Any translated version may not be used for interpretation of the German version.**

Price sheet as of 01.01.2014

The above mentioned tariffs for meter operation apply to the above listed meters. If a connection customer wishes the metering at an exit point to an end-consumer or a network interconnection point to be realized by a measuring equipment different from the above listed, Thyssengas will inform the transport customer immediately concerning the tariff for meter operation for the measuring equipment concerned.

## 6.2 Tariffs for meter reading at exit points to end-consumers and network interconnection points

For the case that Thyssengas is the meter operator and the metering service provider, the following tariffs apply:

Type	Meter reading in €/a per measuring bar <sup>1)</sup>
Meter with electronic supplementary equipment	326.98
Meter without electronic supplementary equipment	93.42

<sup>1)</sup> Valid for measuring bars with meter owned by Thyssengas

**Published contracts and other documents are legally binding exclusively in the German language version. Translated contracts and documents such as this price sheet serve informational purposes only. Therefore the German text shall take precedence over any translated version in case of a contradiction between the German and the translated text. Any translated version may not be used for interpretation of the German version.**

Price sheet as of 01.01.2014

**6.3 Tariffs for billing at exit points to end-consumers and storages** in line with the calibration regulations and particularly in line with DVGW worksheet G 685 (including technical volume determination)

Type	Billing in €/a per measuring bar <sup>1)</sup> with implemented hourly measured value transmission	Billing in €/a per measuring bar <sup>1)</sup> without implemented hourly measured value transmission
Meter with electronic supplementary equipment	2,050.95	585.03
Meter without electronic supplementary equipment	-----	325.02

<sup>1)</sup> Valid independently from ownership of the meter

The tariffs for billing are depending on the existing technical facilities of the respective exit point.
